

Support for Ukraine

Dear customers, supply chain and our other partners.

We are all deeply concerned at the tragic and unwarranted events taking place in the Ukraine, the very sad loss of life and the incredible number of people fleeing to become refugees from their own country.

We all have many challenges ahead including the rising costs of fuel, energy, food and other materials but luckily as a group we are in a position to provide support where it is needed most, and therefore we are immediately donating **£50,000** to help support the Ukrainians.

For those of you who are able, please follow our example and provide your support. The Disaster Emergency Committee for the Ukraine has now been launched to include the Red Cross. UK Gov will also double any donation up to £20m. Follow the link below for information.
